

Children's Mercy Kansas City offers our Performance Based Medical Interpreter Modules bundle to provide training for medical interpreters in several pediatric clinical areas.

Bundles are offered for a flat rate. We encourage learners to "Select All" on the registration form to gain access to all four modules within a bundle.

Once registered, you will find the modules under My CME and Tests. Complete the exercises and submit them as instructed to receive feedback on your performance.

Within two weeks of submission, learners will receive feedback on their performance and information on their credit. Please direct any questions to [cme@cmh.edu](mailto:cme@cmh.edu).
